Description of Service: Panel in trouble

Work Performed:

On arrival panel was showing missing batteries. Batteries in parallel or hooked up wrong NOT BY ATECH. I got a call Saturday at about 2:15 from a gentleman just giving me an address she did not give me his name or the name to the building. He wanted to know how to silence the panel I could not tell him that because I did not know who he was and what building he was calling from. it's against the law to silence a panel without knowing what's going on first when I told him that he called me every name in the book. His phone number is 786-201-8945 the only thing that he gave me was he was from unit-2 so he said. Approximately about 5:20 I got a phone call from a lady telling me she was the president of the building she asked if she could silence the panel I asked her what was going on and she told me to panel said listen battery apartment 1. I allowed her to silence the trouble until Monday and I told her on Sunday around this time at 5:20 it would be beeping and she would have to silence it again on Sunday she was very nice and she did as what I told her to do. What I did today was put new batteries in and wired it up the right way. The phone number to the lady is 954-540-8533. I did not find any
